### Operating Instructions

Note: Please follow all safety instructions affixed to this machine.

1. Lift the perforated bottom and add water to the warmer base to cover the burner.
2. Replace the perforated bottom.
3. Place hot dogs into the compartment.
4. Place buns in the wire compartment.
5. Plug the machine into a 15 amp outlet, and turn on high to cook or lower to warm.
6. Capacity is 40-50 hot dogs at a time. This machine is capable of cooking 400 hot dogs per hour.
7. If an extension cord is needed, make sure it is an industrial gauge.

Note: Take refrigerator temperature hotdogs directly from a cooler and place them into the steamer. Cooked hotdogs should achieve and maintain an internal temperature of 140 degrees. We strongly recommend utilizing a small meat thermometer to ensure that the product is served at the correct temperature for optimal food safety.
