### Operating Instructions

**Note:** Always follow all safety instructions affixed to this machine.

1. The Bubble Machine must be used in a horizontal position on a level surface, or it may be mounted using the bracket provided, ensuring that the bubbles are not shooting directly at anyone's face or above areas of heavy traffic as bubble fluid leaves a slippery surface. Whatever installation method you choose, the machine must not have more than a 5-degree angle of inclination.
2. This machine **requires a dedicated 15-amp outlet.**
3. Place the machine on a level surface and pour approximately 1 cup of bubble juice into the tank. Now plug in the unit.
4. It would be best if you now were enjoying hundreds of bubbles.
5. To avoid fluid from becoming contaminated, replace the cap after each use.
6. If you experience low output or no output at all, unplug immediately. Check the fluid level, external fuse, and main power supply. If it appears to be ok, plug it in again. If you cannot determine the cause of the problem, contact us immediately.

### Clean up:

- After use, ensure all the fluid is drained before moving. It will help reduce costly parts replacement and repair charges.
- While the unit is unplugged, empty all the bubble fluid and rinses with warm water, plug the unit in and run until all wands are free of residue. The unit's body may be cleaned with a soft, damp cloth.

### Caution:

- Do not obstruct the bubble wands.
- Never allow children to place fingers inside the front of the machine.
- Do not leave the machine unattended. Bubble fluid produces slippery surfaces on the floor.
- Never drink the fluid. If it is ingested, call your doctor immediately.
- If fluid comes in contact with skin or eyes, rinse thoroughly with water.
- Beware of overfilling or spillage.

For any questions or concerns, be sure to contact us immediately.
